ZOBELL, CLAUDE E., AND CARROLL W. GRANT. Bacterial oxidation of rubber 381

SUBJECTS

Absorption of oil by rubber 818
Accelerators and colors in sponge rubber 438
in Buna-S, action of organic 184
x-ray study of reaction involving 621
Acidic components in compounding NH_3-preserved latex with zinc oxide 342
Acids in preserved latex 365
Action of organic accelerators in Buna-S 184
Aging, accelerated light, of synthetic rubbers. 209
natural, of reclaimed rubber 417
of rubber, accelerated light, test program on 668
of rubber in the oxygen bomb at room temperature 924
oxygen pressure, effect of temperature and pressure on 453
α-Methylenic reactivity in olefinic and polyolefinic systems 769
Alkyl groups in xylene, autoöxidizability of ... 85
Analysis of synthetic rubber by spectroscopic method 634
Apparatus, flexing, low-temperature 692
Autoöxidation reactions,
course and mechanism of 756
in polyisoprenes. I 17
II 45
VI 790
Autoöxidizability of the alkyl groups in xylene 85

Bacterial oxidation of rubber 381
preventing 618
Balata and *Hevea* latices, motion picture study of 509
Benzene, system rubber-, thermodynamical study of 89
β-isoprene sulfone, crystal structure of 486
Brass-plating 930
Brittle temperature of rubber under variable stress 609
Broad nomenclature for carbon blacks 695
Buna for hard rubber linings 698
plasticization of 866
-S, action of organic accelerators in 184
and Neoprene latices 509
compounds, cut growth of 897
Butadiene-styrene copolymer, sulfur in 901

Carbon black, identification of, by surface-area measurements 687
blacks, broad nomenclature for 695
Chain scission in low-molecular polyisoprenes. 45
Chains, long organic, thermal motion of 1
Change in the Raman spectra of chloroprene and isoprene in the polymerization process 841
Character of the thermal motion of long organic chains, with reference to the elastic properties of rubber 1
Characteristics of wild rubbers 933
Charles Goodyear Memorial Lecture. The second mile 713
Chemical reactions of rubber 111
Chloroprene, Raman spectra of 841
Chromic acid oxidation method for direct determination of rubber hydrocarbon 660
Colloidchemical results, oxidation of rubber and its 571
Colors in sponge rubber 438
Compounding Government synthetic rubber, role of zinc oxide in 650
Concentrating and purifying latex, electrodecantation for 529
Conductivity of rubber tread stocks 918
Course and mechanism of autoöxidation reactions in olefinic and polyolefinic substances, including rubber 756
of autoöxidation reactions in polyisoprenes and allied compounds. I. Structure and reactive tendencies of peroxides of simple olefins 17
II. Hydroperoxidic structure and chain scission in low-molecular polyisoprenes 45
VI. Peroxidation of rubber 790
Cracking, flex-, characteristics of GR-S (Buna-S) compounds 901
Crude rubber, USF, a new 560
Cryoscopic and viscosity studies of polyisobutylene, cryoscopic deviation of polyisobutylene solutions from Raoult's law .. 69
data on polystyrene 58
Crystal structure of β-isoprene sulfone 486
structure of rubber hydrochloride 848
Cut growth of Buna-S compounds, a method to determine the rate of cut growth of Buna-S compounds 897

Decomposition, thermal, of natural and synthetic rubber stocks 127
Density measurements on synthetic rubbers .. 244
Determination of rubber hydrocarbon by chromic acid oxidation method 660
of total sulfur in rubber and rubberlike materials 675
Development of synthetic rubbers, theory of rubber elasticity for 286
Digest of coöperative test program on accelerated light aging of rubber 668
Direct determination of rubber hydrocarbon. Chromic acid oxidation method 660
Dispersed systems, solvation in, XII 86
Distribution of nonrubber substances in preserved latex. II. Acids 365
Double-bond displacement, in connection with olefinic systems 770
Dynamic properties of rubber, some 136

Page

Ebonite, plastic-elastic behavior of 754
Effect of petroleum products on Buna-S vulcanizates 910
of temperature and pressure on oxygen pressure aging 453
of temperature on the resilience of natural and synthetic rubber 881
Elastic behavior of ebonite, plastic 754
extension of rubber, thermodynamic study of 755
properties of rubber 1
Elasticity in synthetic polymers, kinetics of high 760
kinetics of rubberlike 756
Elasticity of a network of long-chain molecules. I 746
of synthetic rubbers at low temperatures ... 888
theory of rubber, for development of synthetic rubbers 286
Electrical properties of Neoprene 699
Electrodecantation for concentrating and purifying latex 529
Electrophoretic study of the proteins in rubber latex serum 542
Energy, resilient 591
Equation of state of some synthetic rubbers .. 290
Equations of state for natural and synthetic rubberlike materials. I. Unaccelerated natural soft rubber 297
Evaluation of small amounts of synthetic rubber 679
Experiments on the preparation of transparent vulcanized rubber 445
Extraction, methylethyl ketone, of rubber 383

Filler reinforcement in rubber, theory of 124
Flex-cracking of GR-S (Buna-S) compounds .. 901
Flexing apparatus, low-temperature 692
Free radicals, molecule-linking capacity of 467
Frictional properties of rubber 155

GR-S (Buna-S) compounds 901
Gels, properties of rubber solutions and 550
Goodyear Memorial Lecture. The second mile 713
Government synthetic rubber, zinc oxide in compounding 650
Growing rubber in North America 249

Hard rubber linings for Buna 698
Heat sensitizers for rubber latices, nitroparaffins and derivatives as 215
Hevea brasiliensis, phosphatides of 536
How sulfur is combined in vulcanized rubber . 834
Hycar-OR, specific heat of, from 15° to 340° K 310
Hydrocarbon molecules, rubberlike 479
Hydrochloride, rubber, crystal structure of ... 848
Hydroperoxidic structure and chain scission in low-molecular polyisoprenes 45

Identification of carbon black by surface area measurements 687
Imbibition of liquids by rubber, influence of chemical structure on 752
Importance of acidic components in compounding ammonia-preserved latex with zinc oxide 342
Influence of chemical structure on the imbibition of liquids by rubber. I 752
Interaction between rubber and liquids.
I. Thermodynamical study of the system: rubber-benzene 89
II. Thermodynamical basis of the swelling and solution of rubber 752
III. Swelling of vulcanized rubber in various liquids 263
IV. Factors governing the absorption of oil by rubber 818
Intermolecular forces and mechanical behavior of high polymers 268
Ionic and radical mechanisms in olefinic systems, with special reference to processes of double-bond displacement, vulcanization and photogelling 770
Isoprene, Raman spectra of 841

Kinetics of high elasticity in synthetic polymers 760
of rubberlike elasticity 756

Page

Latex, acidic components in 342
nonrubber substances in preserved 365
electrodecantation for concentrating and purifying 529
particles, part played by adsorption film on 335
serum, electrophoretic study of proteins in . 542
vulcanization of 318
Latices, Balata and *Hevea*, motion picture study of 509
Buna-S and Neoprene 509
Neoprene and Buna-S 509
Nitroparaffins and derivatives as heat sensitizers for 215
Lengths, statistical, of rubberlike hydrocarbon molecules 479
Light aging, accelerated, of rubber 668
of synthetic rubber 209
Linking, molecule-, capacity of free radicals .. 467
Liquids, rubber and 818
swelling of vulcanized rubber in 263
Long spacing in rubber 775
Low temperature flexing apparatus 692
temperatures, testing synthetic rubbers at .. 888

Mechanical behavior of high polymers 268
Mechanism of vulcanization 467
Memorial Lecture. Charles Goodyear 713
Method of testing the elasticity of synthetic rubbers at low temperatures 888
Methylethyl ketone extraction of rubber 383
Microscopy, technical, in rubber industry 219
Molecular weights and intrinsic viscosities of polyisobutylenes 493
Molecule-linking capacity of free radicals 467
stereochemistry of rubber 775
Motion picture study of balata and *Hevea* latices, with observations on Buna-S and Neoprene latices 509

Natural aging of reclaimed rubber 417
Neoprene, electrical properties of 699
latices 509
Network, elasticity of, of long-chain molecules 746
Nitroparaffins and derivatives as heat sensitizers for rubber latices 215
in the rubber industry 926
Nomenclature for carbon blacks, broad 695
Nonrubber substances in preserved latex 365
North America, growing rubber in 249

Observations on the flex-cracking characteristics of GR-S (Buna-S) compounds 901
Oil, absorption by rubber of 818
Olefinic substances, course and mechanism of autoöxidation reactions in 770
systems, α-Methylenic reactivity in 769
systems, ionic and radical mechanisms in ... 770
Olefins, simple, structure of 17
Osmotic pressure of rubber 805
Oxidation, bacterial, of rubber 381
of rubber and its colloidchemical results 571
of rubber, preventing bacterial 618
Oxygen bomb, aging of rubber in 924

Permeability in relation to viscosity and structure of rubber 766
of rubber to water vapor 388
Peroxidation of rubber 790
Peroxides of simple olefins, structure of 17
Petroleum products, effect on Buna-S vulcanizates of 910
Phosphatides of *Hevea brasiliensis* 536
Photogelling in connection with olefinic systems 770
reactions and molecule-linking capacity of free radicals 467
Photogels, rubber 768, 783
Plastic-elastic behavior of ebonite 826
Plasticization of Buna 866
Plating, brass- 930
Polyisobutylene solutions, cryoscopic deviation of, from Raoult's law 69
Polyisobutylenes, molecular weights and viscosities of 493
Polyisoprenes and allied compounds, autoöxidation reactions in. I 17

Page

II. 45
VI. 790
rubber and allied compounds 467
low-molecular 45
Polymerization process. Change in Raman spectra 841
Polymers, high, mechanical behavior of 268
Polyolefinic substances, course and mechanism of autoöxidation reactions in 790
systems, α-Methylenic reactivity in 769
Polystyrene, cryoscopic data on 58
Processing characteristics of synthetic tire rubber 203
Pressure, effect of, on oxygen pressure aging 453
Preventing the bacterial oxidation of rubber 618
Production of industrial sponge rubber 432
Properties of rubber solutions and gels 550
of some synthetic rubbers 857
Proteins in rubber latex serum, electrophoretic study of 542
Purifying latex, electrodecantation for 529

Raman spectra of chloroprene and isoprene 841
Raoult's law, cryoscopic deviation of polyisobutylene solutions from 69
Reactions of rubber 752
of rubber, chemical 111
Reclaimed rubber, natural aging of 417
Reinforcement, filler, in rubber 124
Resilience of natural and synthetic rubber 881
Resilient energy 591
Rise of temperature, fast stretching of synthetics and natural rubbers on 178
Role of zinc oxide in compounding Government synthetic rubber 650
Rubber, hard, linings for Buna 698
hydrochloride, crystal structure of 848
photogels 768
II. 783
polyisoprenes and allied compounds. II. Molecular-linking capacity of free radicals and its bearing on the mechanism of vulcanization and photogelling reactions 467

Scission in low-molecular polyisoprenes, chain 45
Sensitizers, heat, nitroparaffins and derivatives as 215
Serum, electrophoretic study of proteins in rubber latex 542
Solubility of sulfur in butadiene-styrene copolymer 863
Solution and swelling of rubber, thermodynamical basis of 752
Solutions, polyisobutylene, cryoscopic deviations from Raoult's law of 69
and gels. Properties of rubber 550
vapor pressure equations of 805
Solvation in dispersed systems. XII. Influence of surface-active substances on the structure of rubber fractions 86
Some dynamic properties of rubber 136
Spacing in rubber, long 775
Specific heat of the synthetic rubber Hycar-OR from 15° to 340° K 310
Spectra, Raman, of chloroprene 841
Spectroscopic method for analysis and control of synthetic rubber 634
Sponge rubber 435
accelerators and colors in 438
production of industrial 432
Statistical lengths of rubberlike hydrocarbon molecules 479
Staudinger's viscosity rule 58
Stereochemistry of the rubber molecule 775
Stress, brittle temperature of rubber under variable 609
Stretching, fast, of synthetics and natural rubber 178
Structure and chain scission in low-molecular polyisoprenes 45
and reactions of rubber, a general discussion 752
and viscosity of rubber, permeability in relation to 766
chemical, influence of, on imbibition of liquids by rubber 752

Page

crystal, of β-isoprene sulfone 486
crystal, of rubber hydrochloride 848
of peroxides of simple olefins 17
of rubber fractions 86
Sulfur, combination of 332
combined, in vulcanized rubber 834
solubility of, in butadiene-styrene copolymer 863
total, in rubber and rubberlike materials 675
Sunlight and accelerated light aging of synthetic rubber 209
Surface-active substances, influence on rubber fractions of 86
Surface-area measurements, identification of carbon black by 687
Swelling and solution of rubber, thermodynamical basis of 752
Swelling of vulcanized rubber in various liquids 263
Synthetic polymers, kinetics of high elasticity in 760
rubber, spectroscopic method for analysis and control 634
System: rubber-benzene, thermodynamical study of 89
